

# News and Announcements

– December 14, 2020 –

Please see below for several updates:

## **Registration Deadline- 12/18/20**

This is a final reminder that the registration deadline for the 2020/21 MSO season is **this Friday, December 18, 2020.**

All teams must be registered in the MD Scilympiad portal (<https://scilympiad.com/md>) to be eligible to compete in Science Olympiad competitions for the season. A reminder that each school is eligible to register up to 3 teams per school for Regional competitions.

## **Event Clinics for MD Teams**

Some of our content experts in MD are very graciously running FREE webinar event clinics for MSO teams in late December and early January.

The focus of these events will be on problem solving strategies to help students prepare for competition. All MSO students are welcome to attend, registration is 'first come first serve' to the maximum allowed on the webinar platform.

The current list of events includes Heredity, Designer Genes, and Disease Detectives. Circuit Lab and Density Lab are in the works, and more may be posted in the future.

For event information and registration info, please go to: <https://www.blyseducation.org/coaching>

## **Coach Mailing List and Update Distributions**

Starting January 1, we will reduce our primary email distribution list to registered coaches in Scilympiad. Coaches and team captains are welcome to affiliate with their school in Scilympiad to be on the direct mailing lists, though we ask to limit to key members so that we do not max out our messaging numbers.

A reminder that we are also posting update messages and links to our social media pages and on Scilympiad under Resources -> Tournament Documents. All team and community members are welcome to follow us and access documents in these locations to keep up to date.

Thank you as always for all you do. If you need any assistance, please feel free to reach out and we will help as best we can.

Thank you, and Happy Holidays!
